Nº 01.

Aesthetic *Macbook Laptop* Mockup
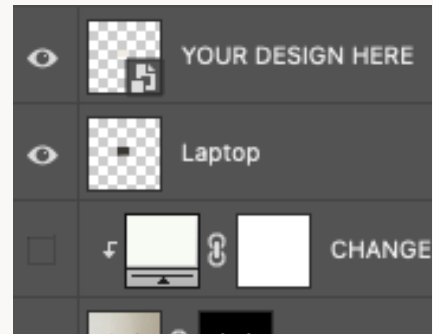

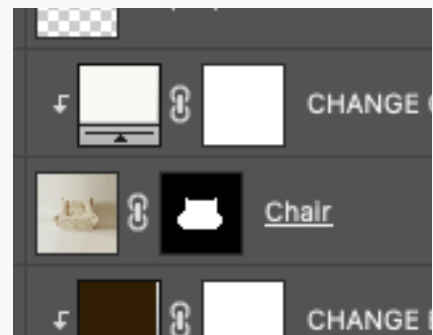

HOW-TO GUIDE

How To Edit

Edit the Laptop Screen

Double-click the layer named "Your Design Here". A new PSD window will appear and you can either drag and drop your design into this new window or create your designs in Photoshop. Click command S to save and close the window. Your design should now appear on the iPad screen. There are effects applied to this layer that make the design look more realistic, but feel free to change or edit these as needed.

Edit the Chair Color

Double-click the layer named "CHANGE CHAIR COLOR" and select a color to be applied to the chair. You may have to adjust the opacity and blend modes in order to create a more realistic look.

Edit the Background Color

Double-click the layer named "CHANGE BACKGROUND COLOR" and select a color to be applied to the floor and walls. You may have to adjust the opacity and blend modes in order to create a more realistic look.
