# Introduction

meet me!

Hi i'm Megan! The owner, marketer and creative mind around Marketing Templates Co.! Before launching my business I was just a fresh faced, retired college athlete with a degree in marketing. After a job in digital marketing I decided to create my own shop centered around helping entrepreneurs and business owners scale their business and get the financial freedom they've always wanted. I thoroughly LOVE what I do and creating templates to grow YOUR business. Thank you for allowing me to create something for YOU! I can honestly, never express my gratitude enough!

About
canva

First, please create a canva account and login.

Create a Canva Account
(Click Here)

Then, please click the link to your desired templates above and your designs will automatically be added to the account you just created!

Please remember, it is easiest to design and edit on your computer versus your phone. If you have any issues, please load your design on your computer.

FAQS

Canva is trying to charge me a fee and I don't understand why?

First, did you replace all the stock images with free stock images from Canva's library or did you add your own? Next, Canva shows you WHY they are trying to charge you. Click the download button, you will see the charges. Click the down area and Canva will show you why and what they are charging you for. Replace that image to avoid charges.

Can I add my logo?

Yes, upload it as a photo file in the uploads tab on the lefthand side and add to any of your templates.

Why can't I add or duplicate a template?

Look to see how many templates you currently have, is it 100? Canva ONLY lets you have 100 templates per section.

How can I download one template at a time?

Click the download icon in the upper righthand corner, click the down arrow on the right next to "All Pages" Click the box to add a checkmark next to the template you'd like to download (You can only do this from your computer, not your phone)
