GETTING STARTED GUIDE, TEMPLATE MODIFICATION BASICS IN CANVA.

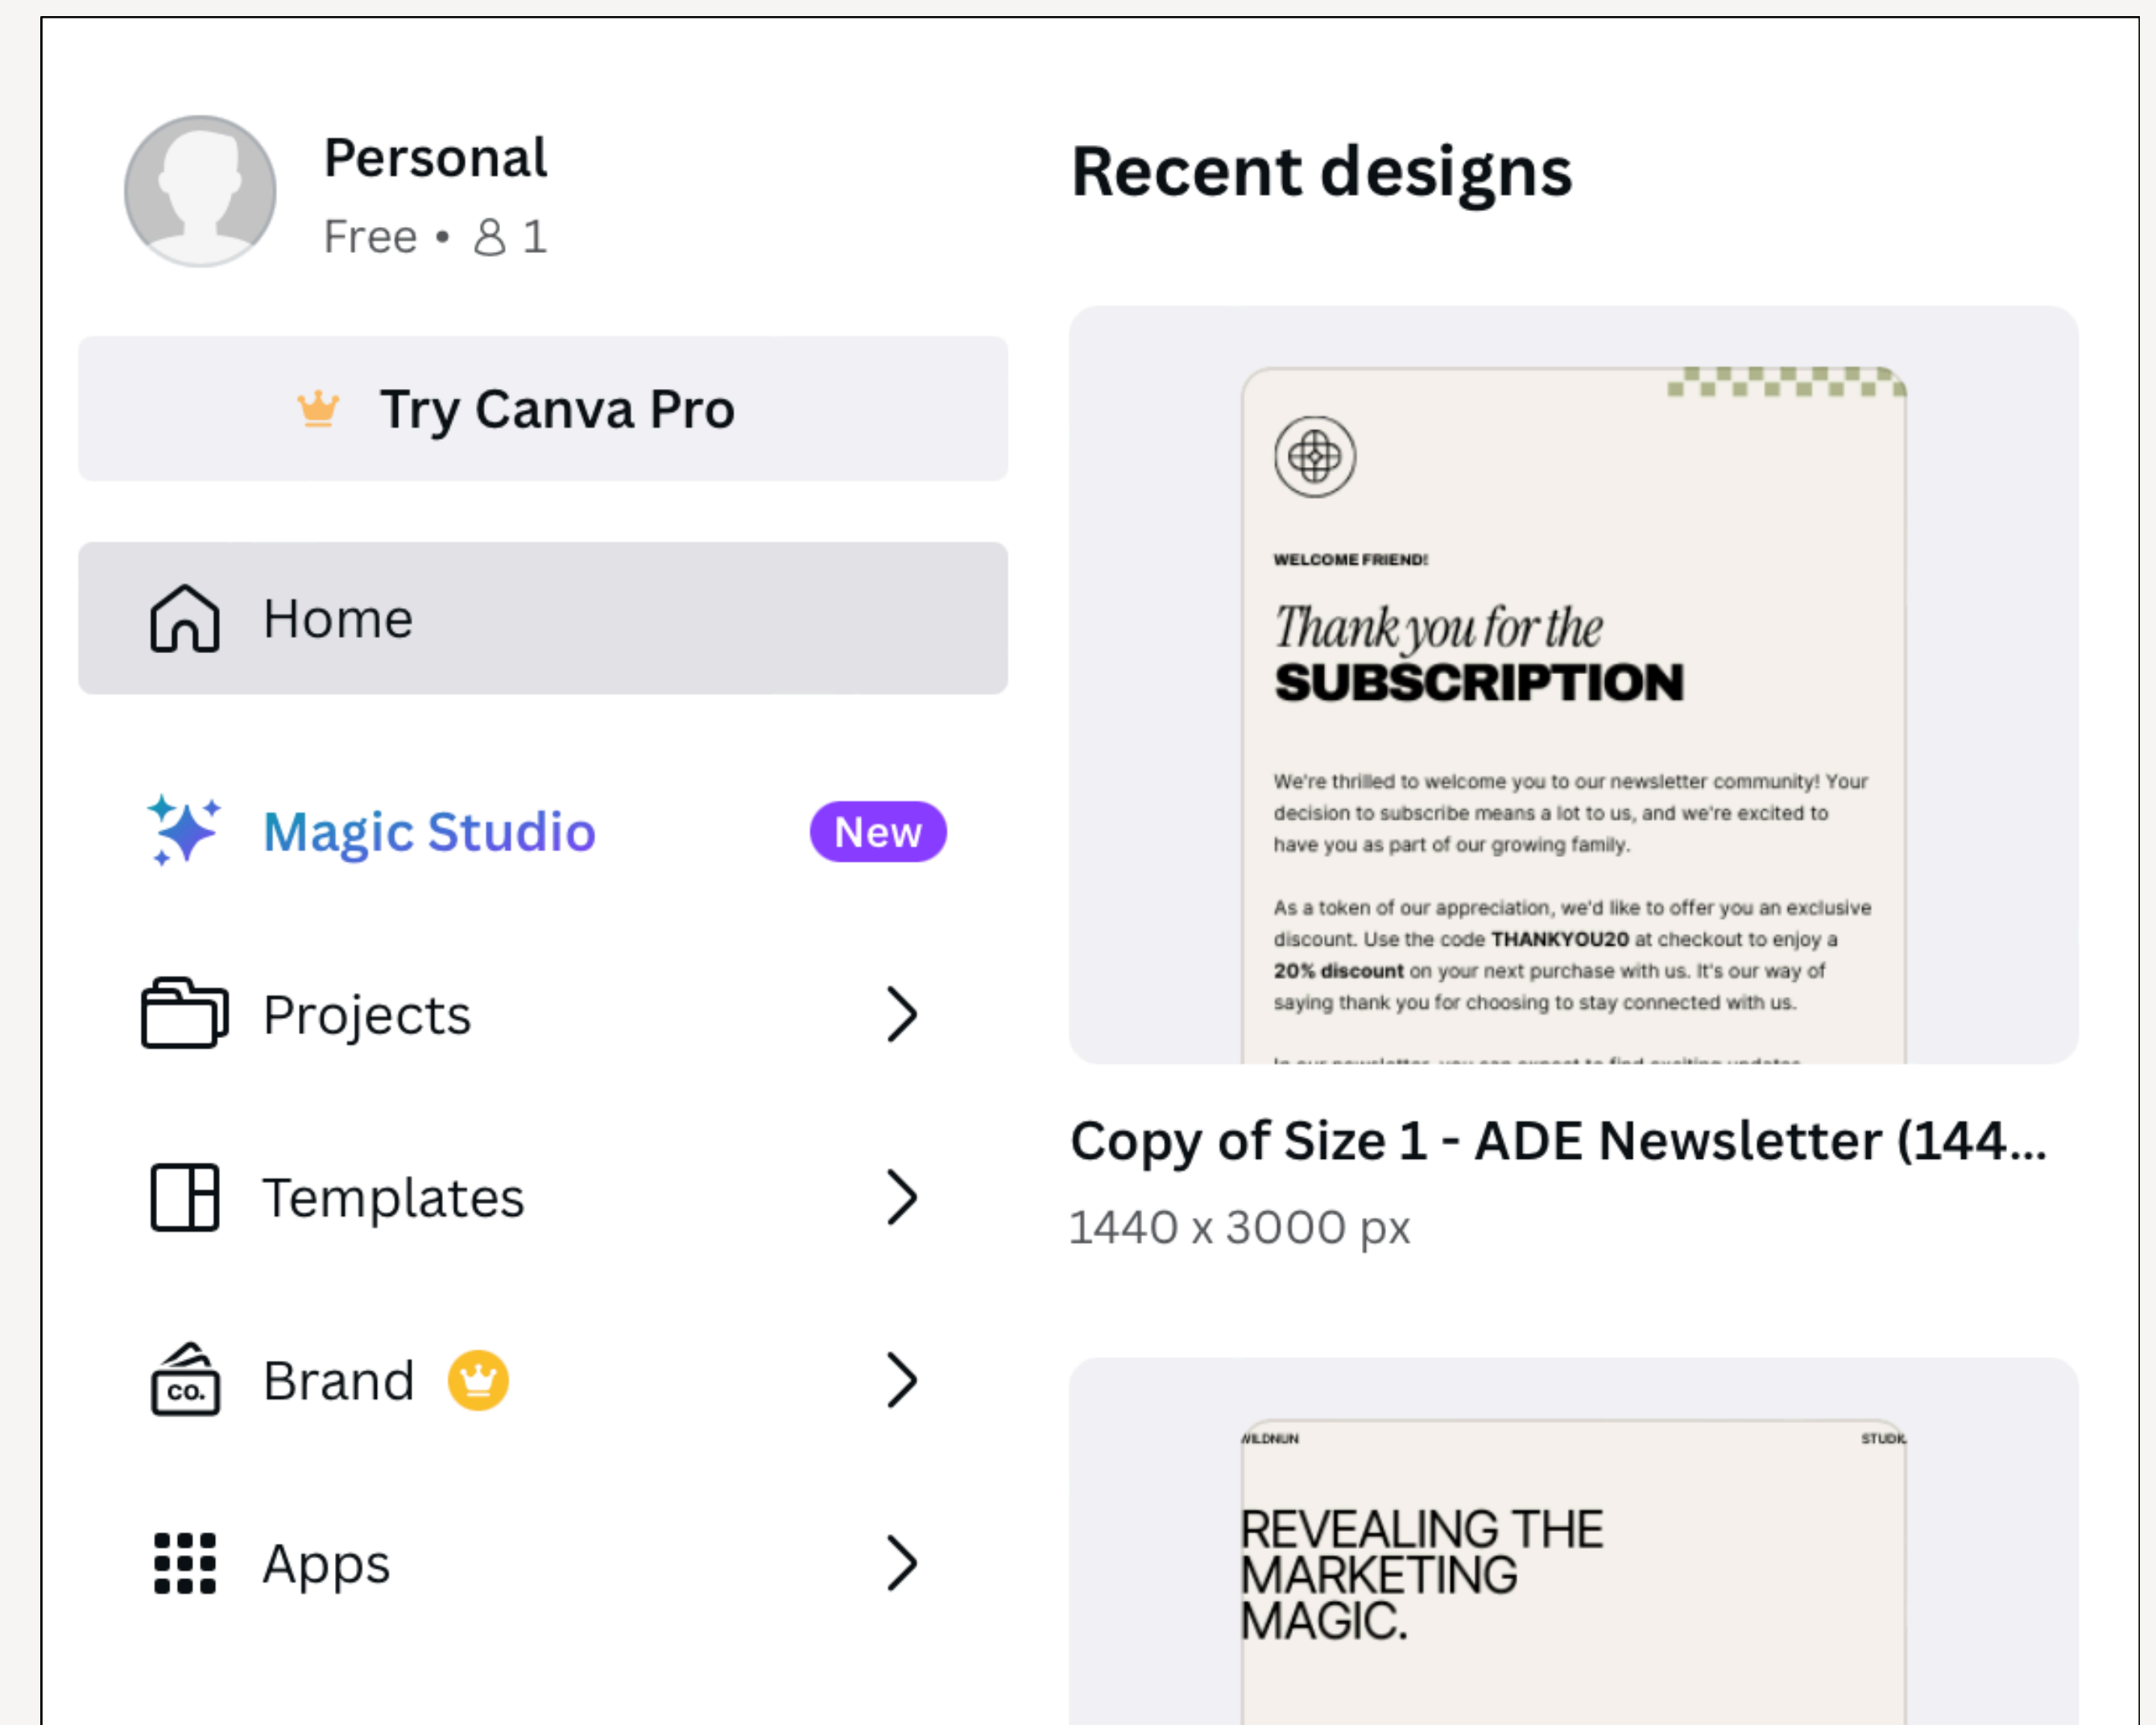

In this manual you will find useful information.
Explore to learn the basics of using this template
and get ready to bring your creative vision to life.

Open and save

Important for getting started, clicking the link will open the template in your Canva account. When you click **"Use template for new design"**, Canva automatically creates a copy in your account.

From there you can start editing your design and each modification will be saved automatically (you will see a small cloud with a check mark in the top bar of Canva every time you modify it).

You can continue designing later if you wish and the design will always be saved in your account. When you want to continue using the design you must go to the Canva Home page and you will see it in the **"Recent designs"** sector or you can find it in the **"Projects"** sector located in the left sidebar. There you can open it and continue editing.

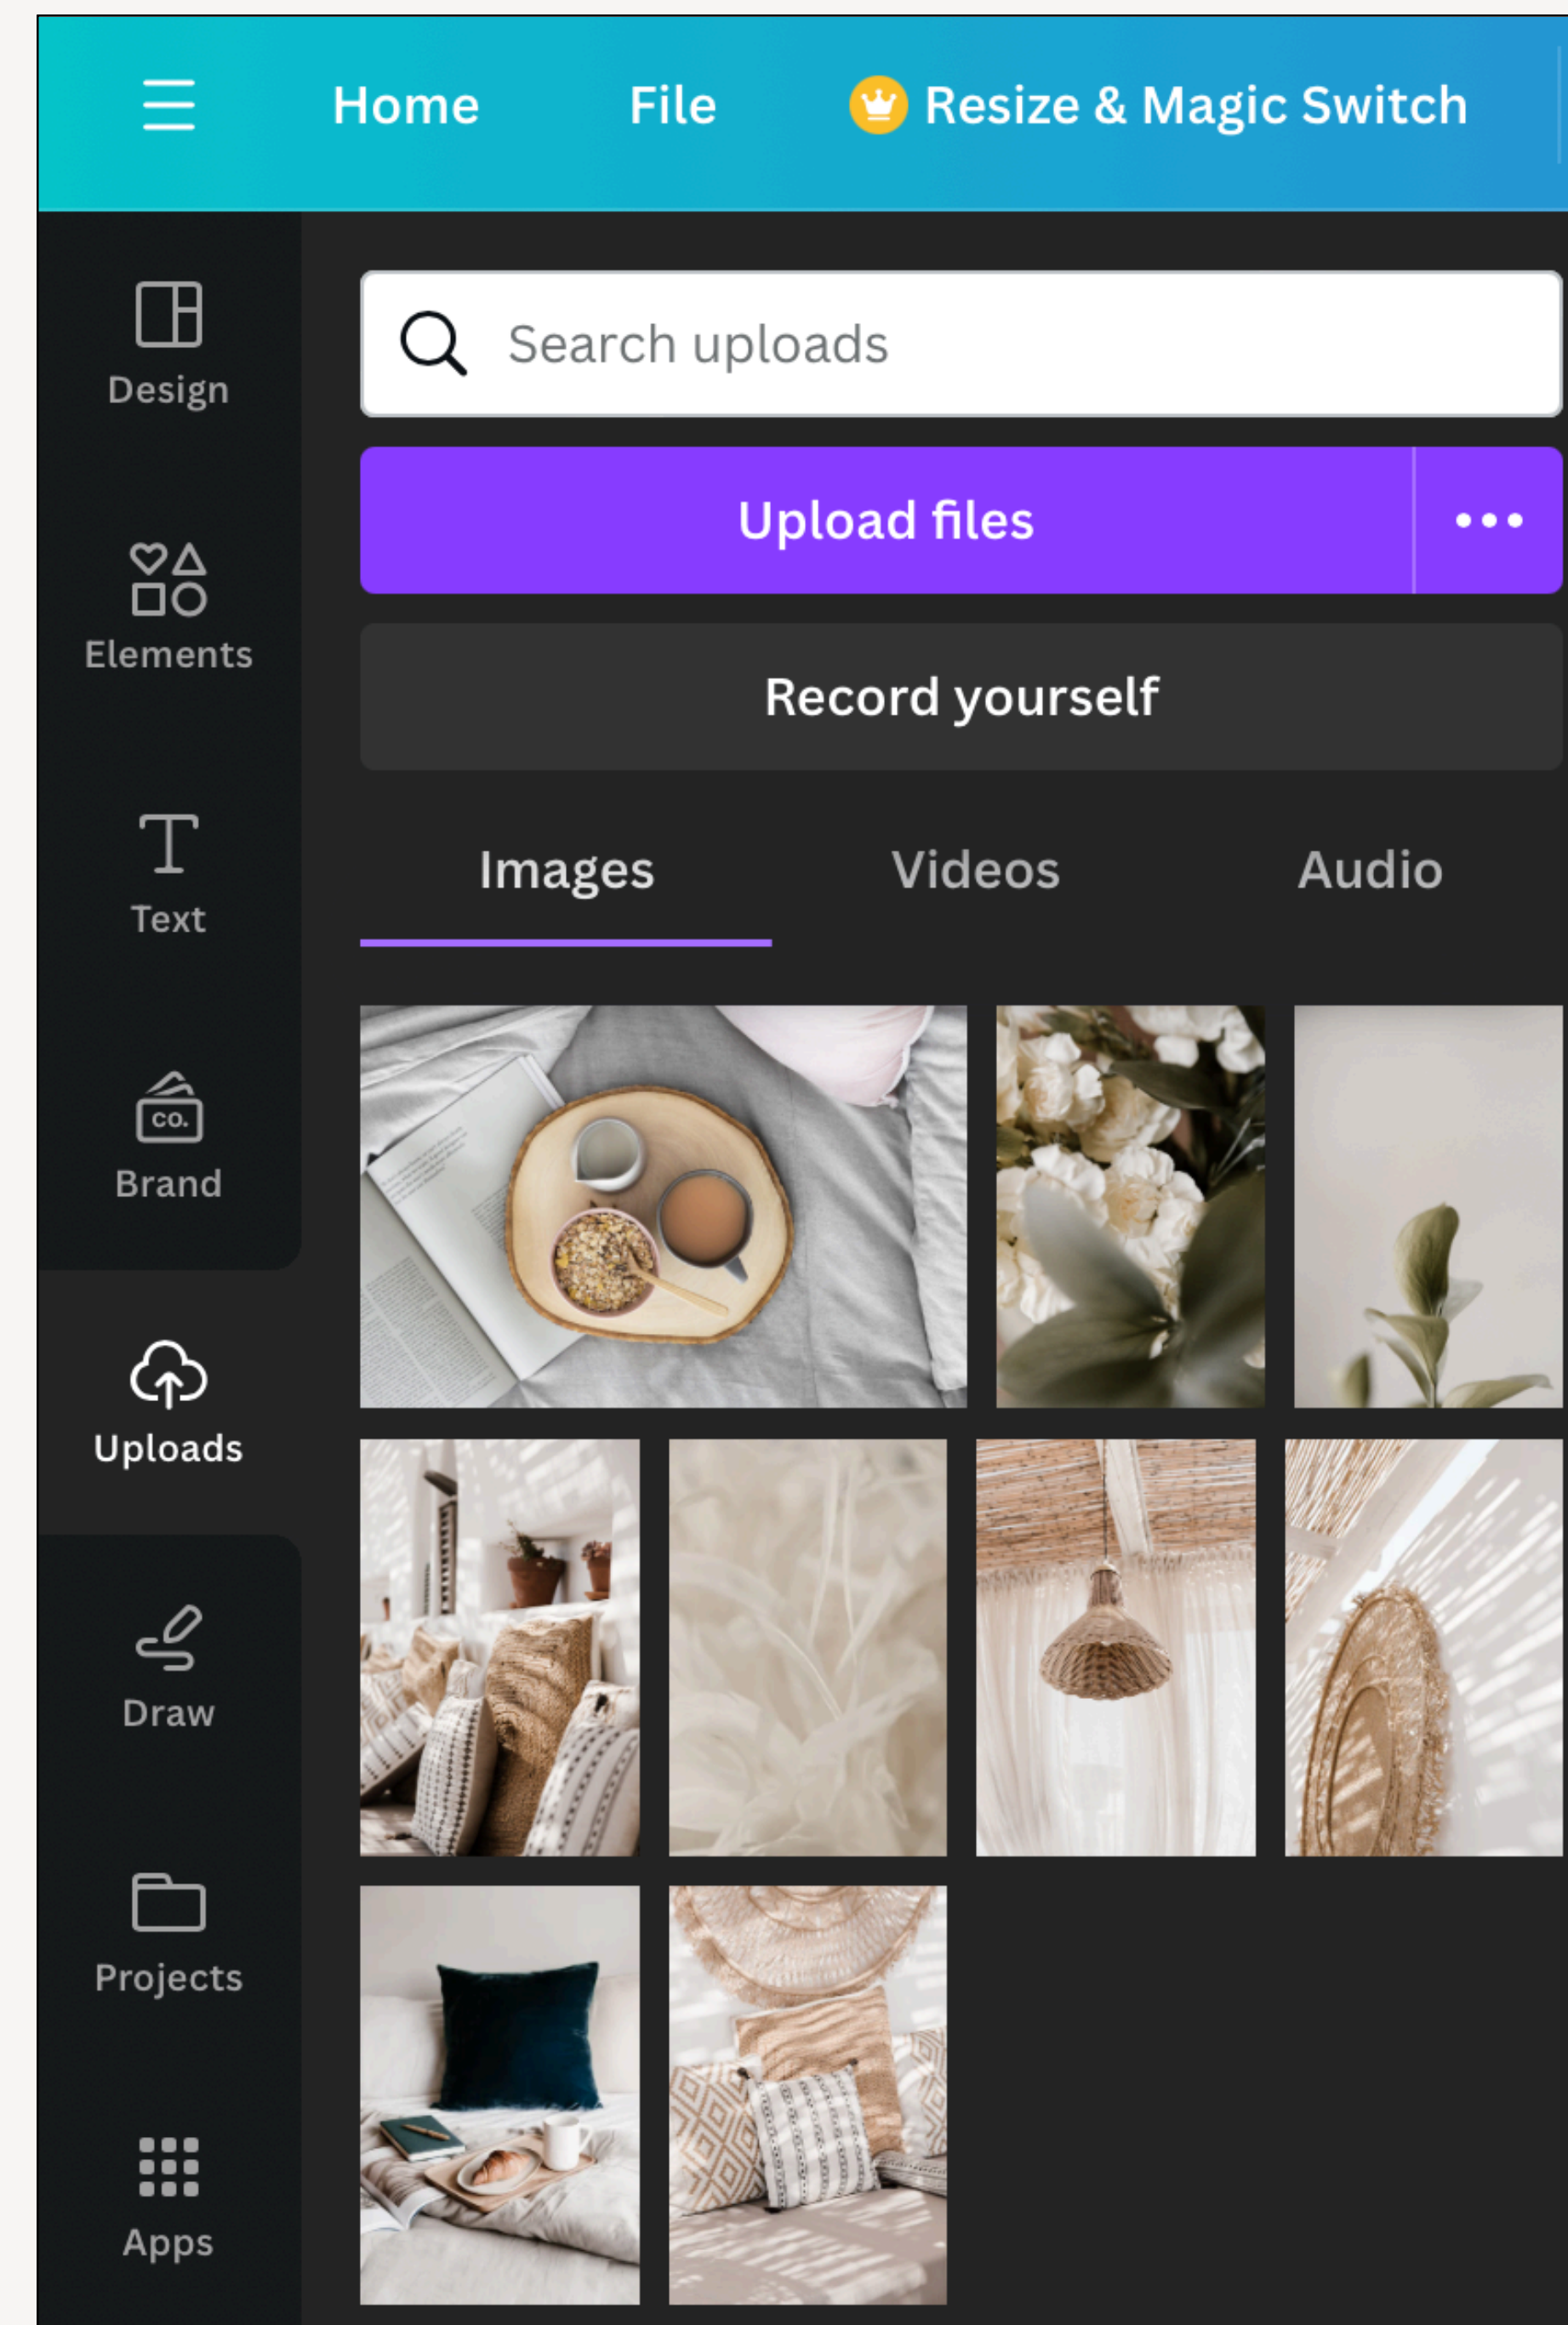

Canva Home page. Recent designs.

Please note - If you ever want to restart the design and start over, you must reopen the template from the PDF and make a new copy.

Add your own photos

When you're designing, go to the left sidebar and select "**Uploads**" and then "**Upload files**". When you click on Upload files, a box of your operating system will open so you can search for the image you want to upload.

Once selected and the upload is complete (it can be one image or many), you can select it and drag it to the corresponding box.

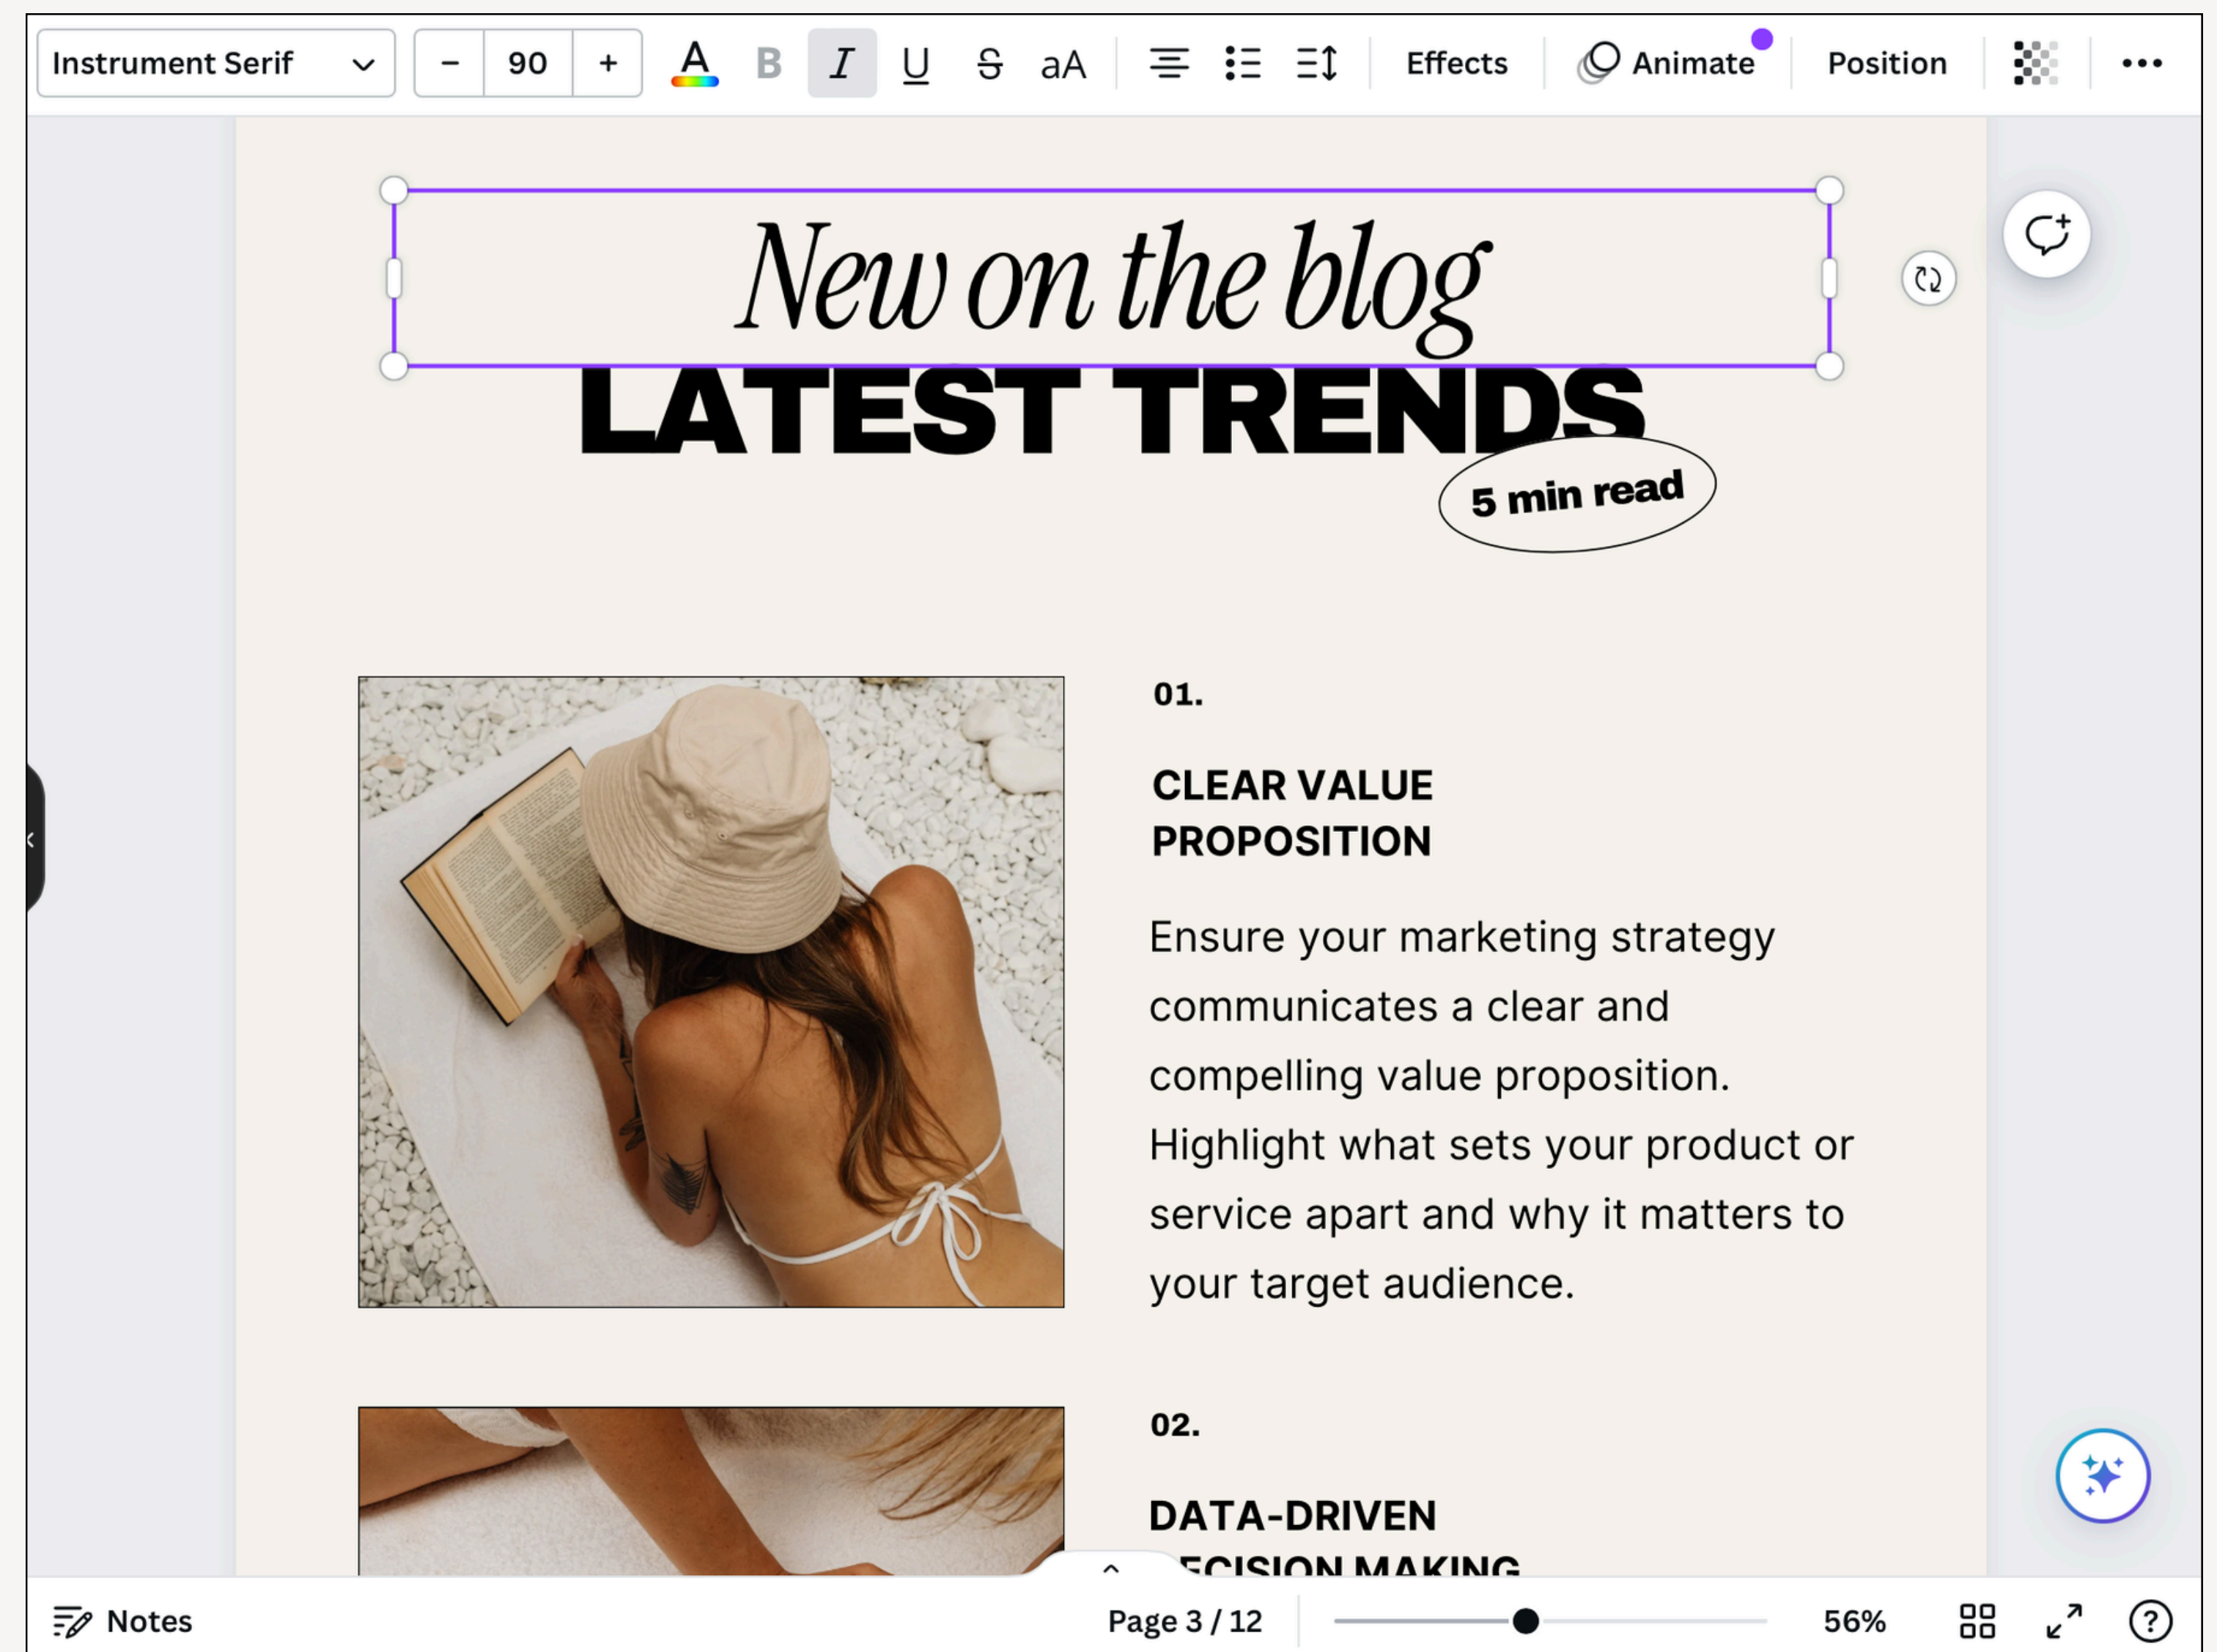

Canva Design Panel Left Sidebar.

Modify the text

To modify one of the texts, you must select it. Doing so will activate the options panel at the top. In it you will find infinite ways to modify them. If you want, you can even choose another font.

You can also put the letter in Bold, Curved and / or Underlined if the option is available for that typeface.

You can also modify its size, color, add effects and more. Browse the panel to discover all the options that Canva offers, there are many and very beautiful!

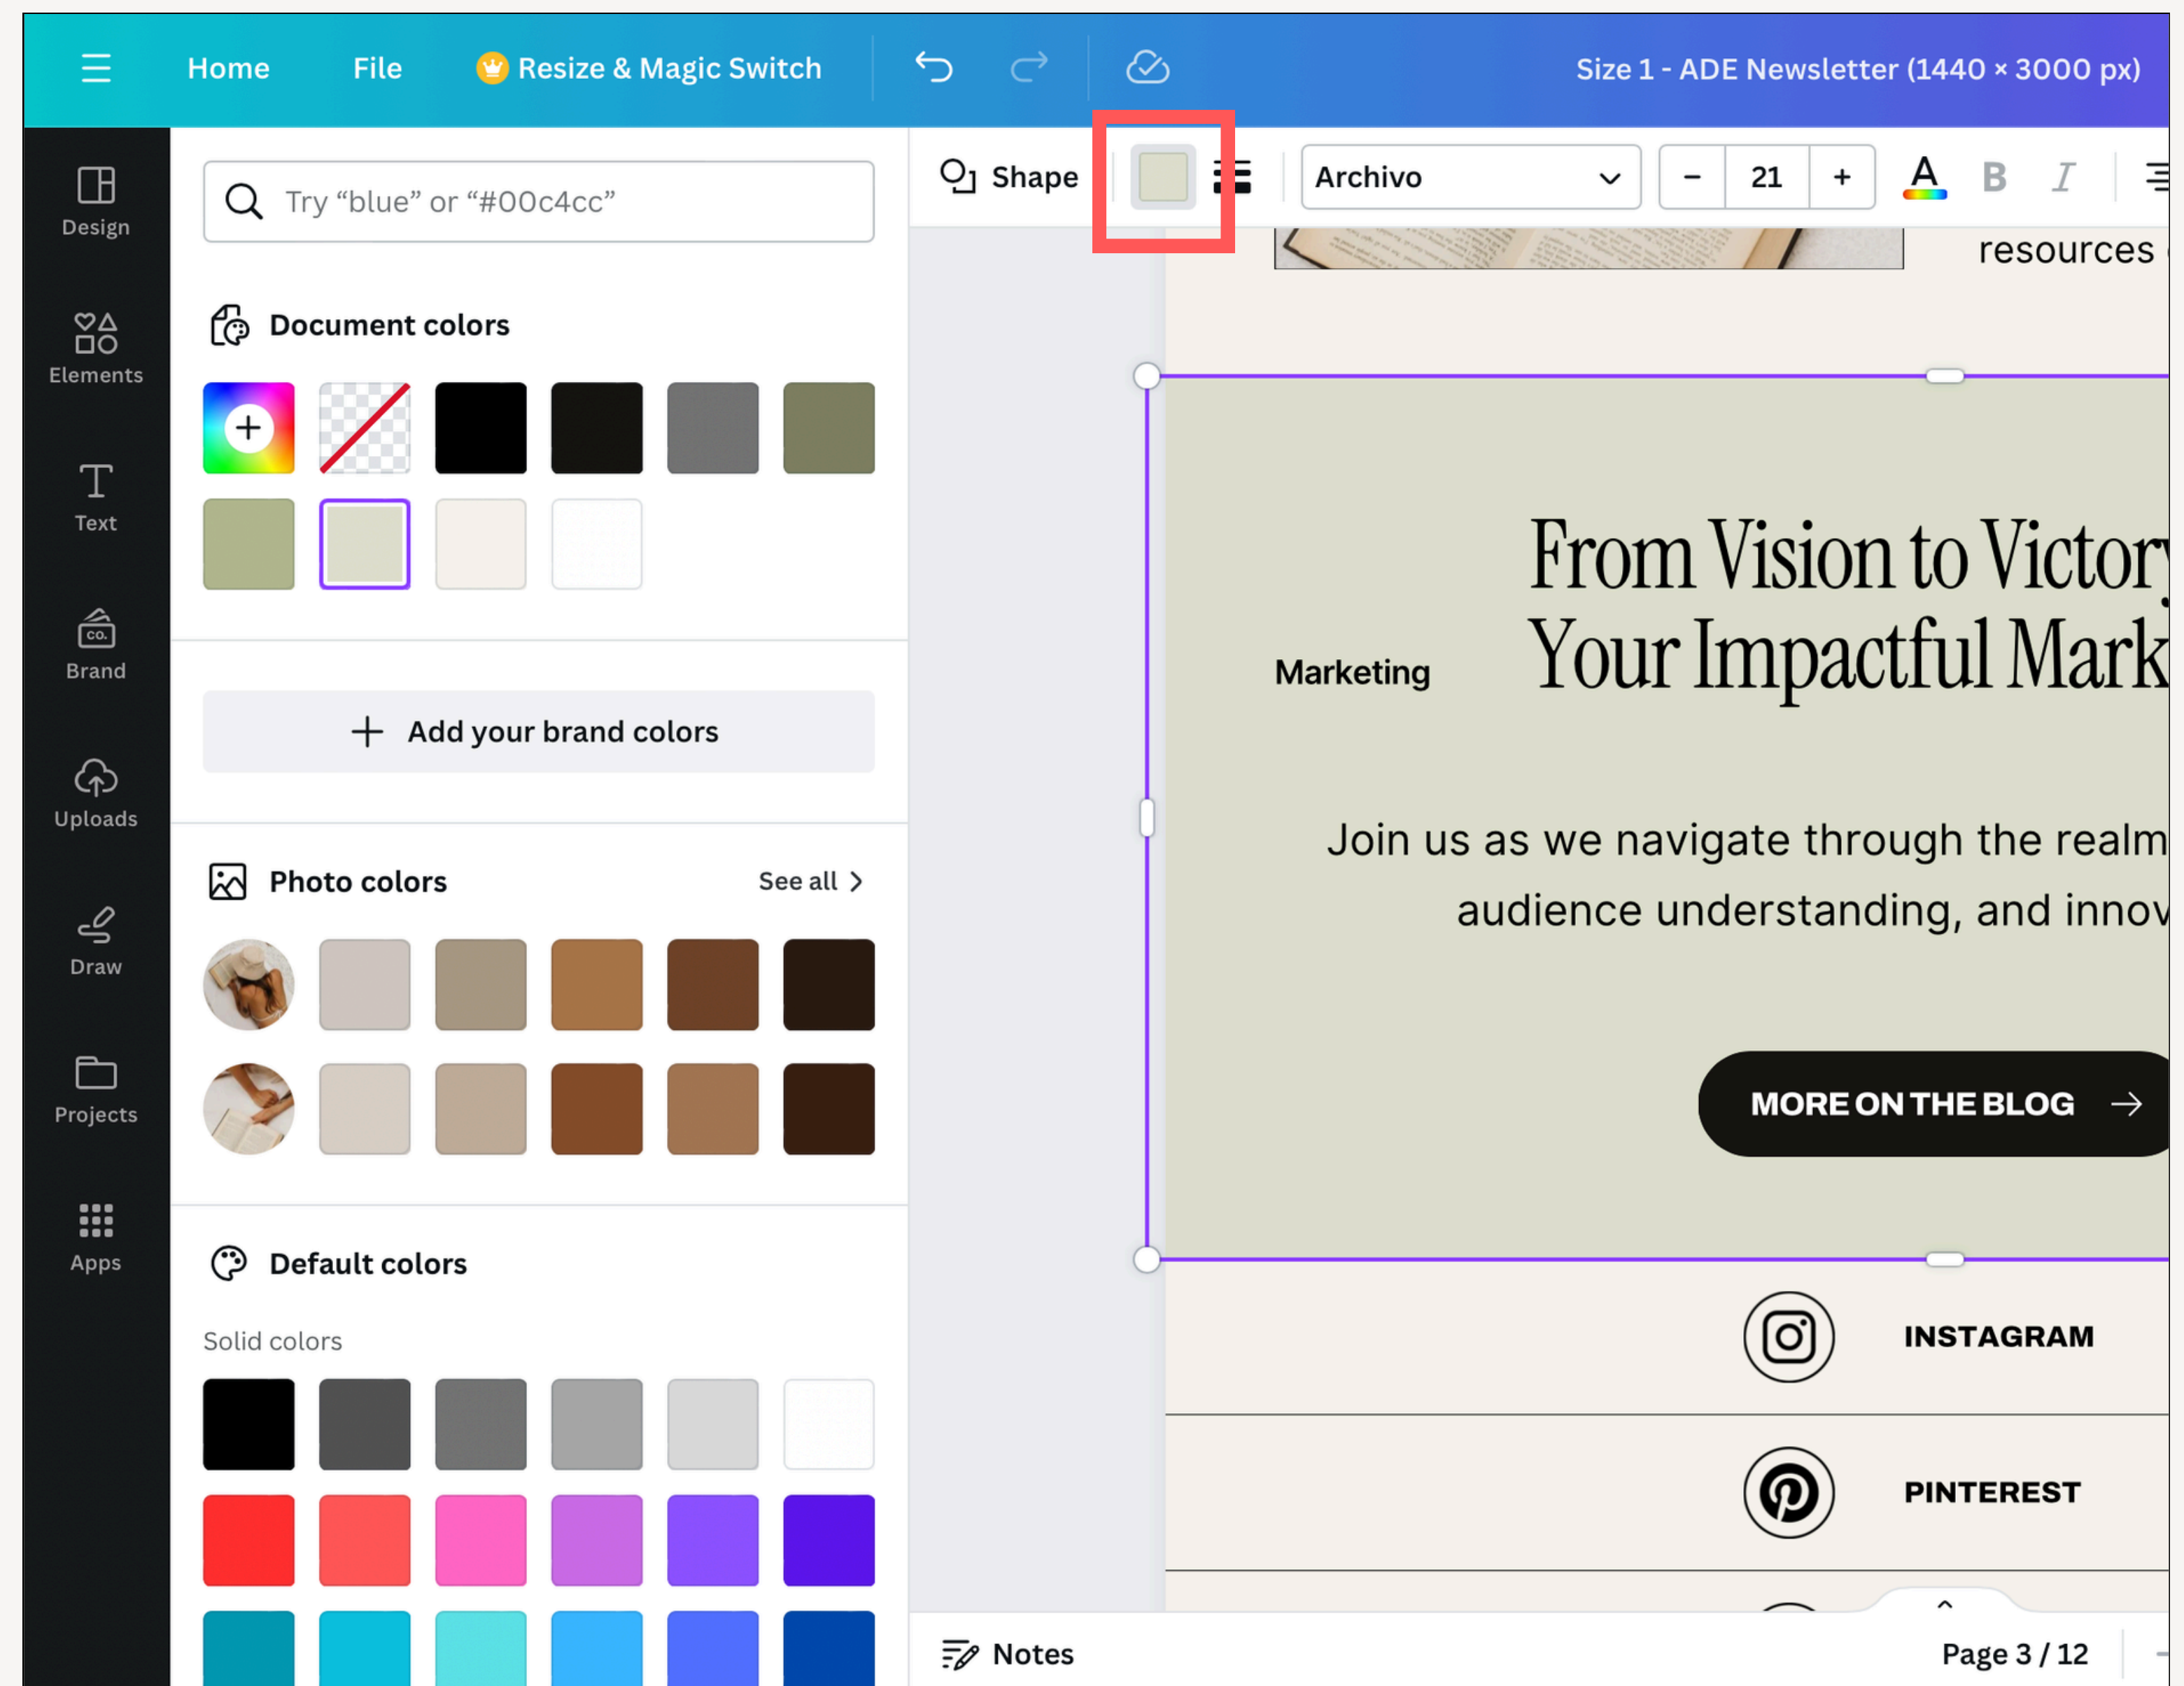

Top panel active when selecting a text.

Background and element colors

To change the color of the background or a graphic element, you must select it and click on the box that appears above (indicated with the red box).

Clicking will open the color panel on the left side, where you can choose the color you want or enter the HEX code of a specific color.

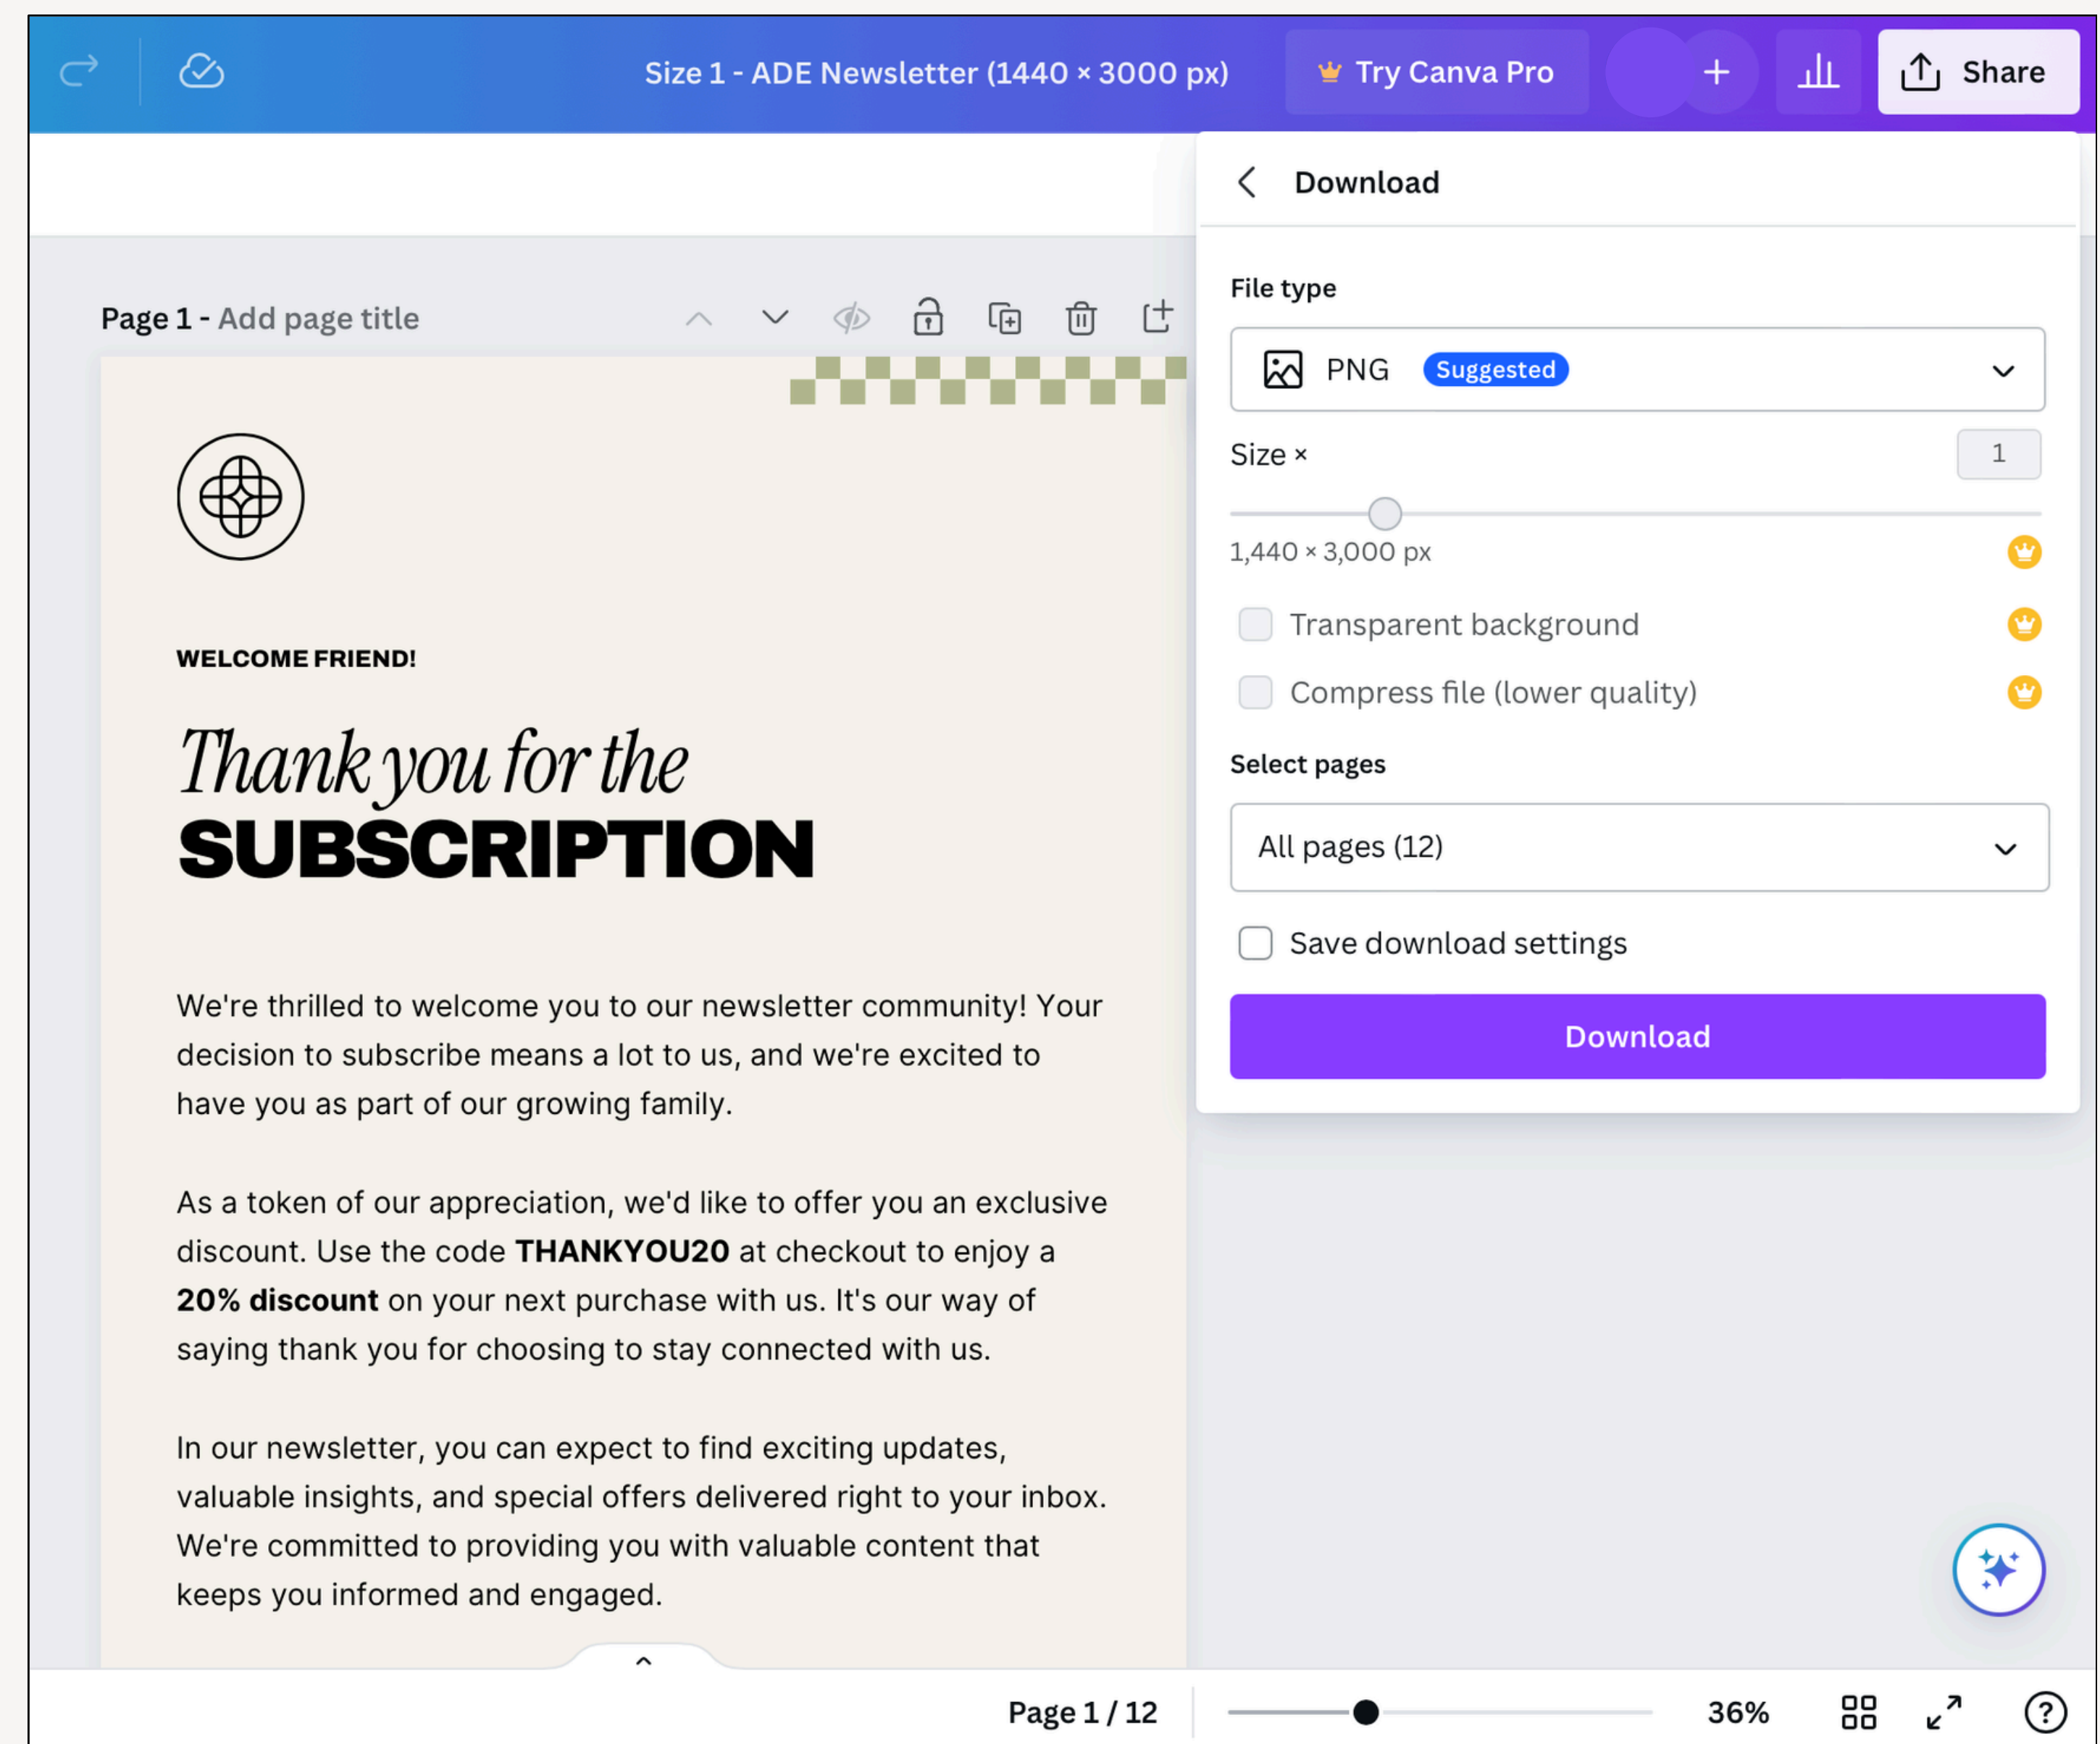

Active color panel in the left sidebar

Download your design

When you want to download a design you must select the “Share” box at the top right. A panel will open in which you will have to select "Download".

Once there, you can select the page you want to download (it can be one, many or all). Select the desired file type and then Download.

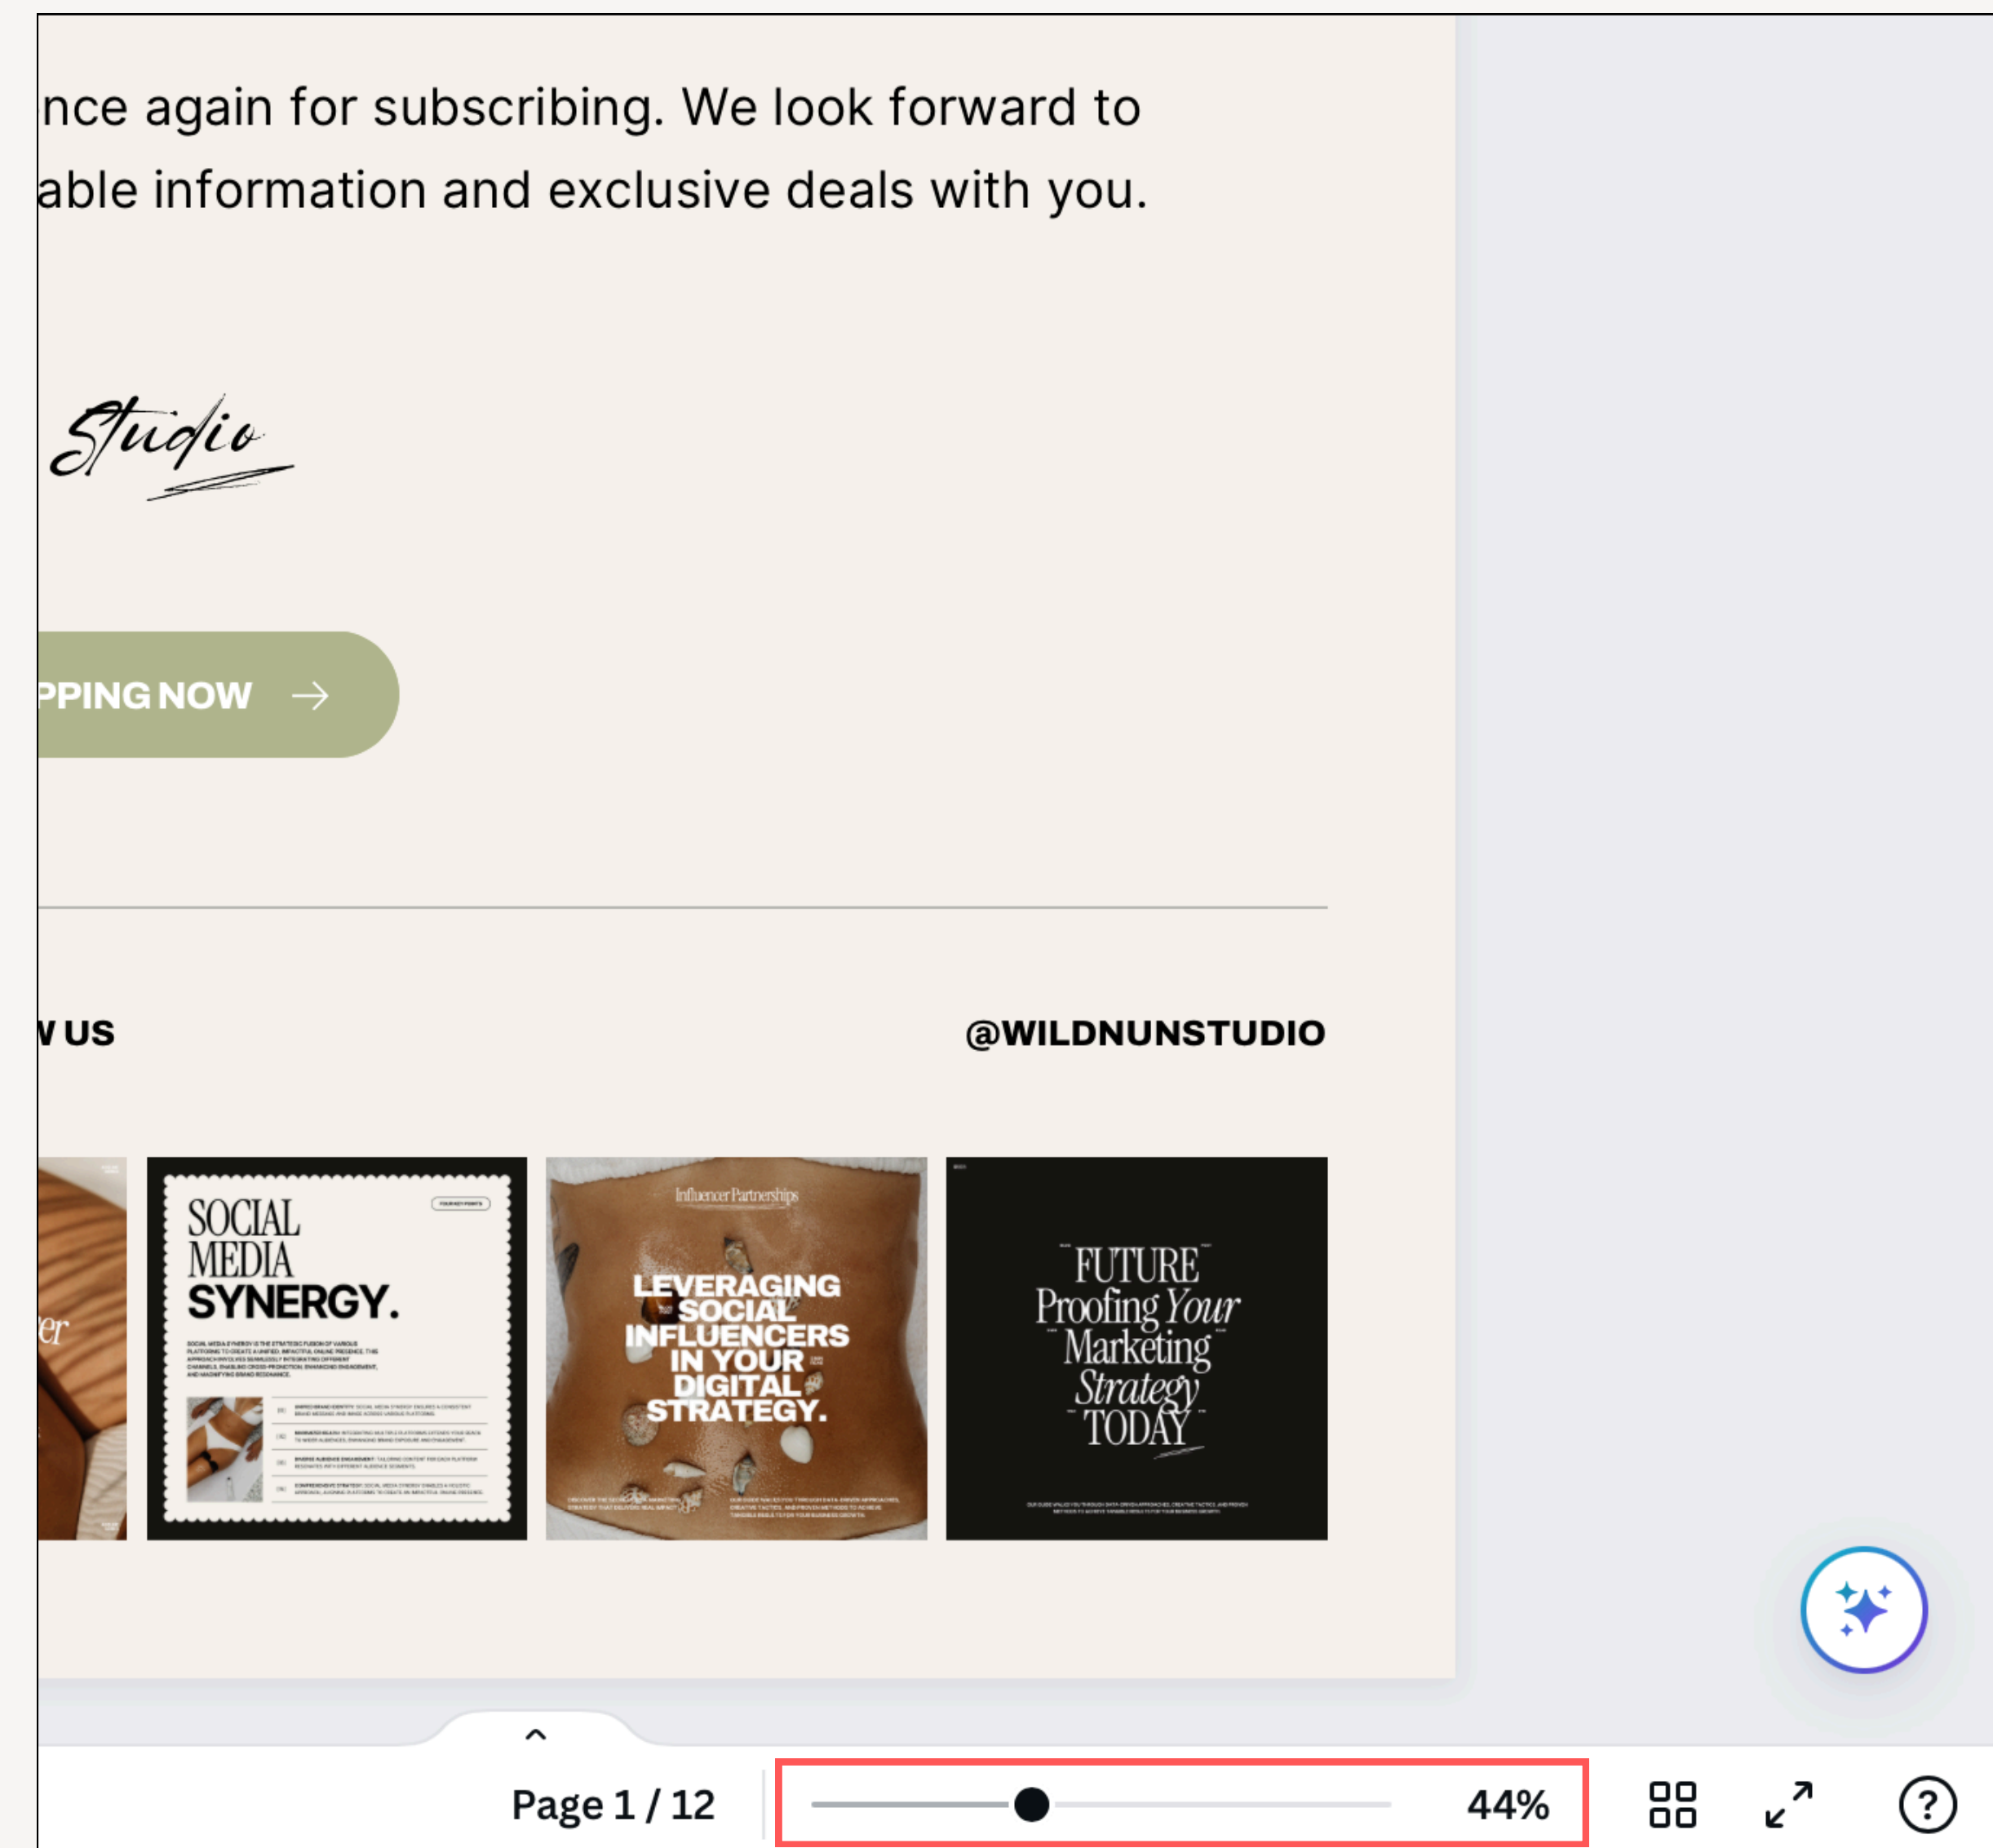

Active download panel.

Tips and tricks

Canva can be very versatile. A tip that cannot be missed, I recommend that when it comes to obtaining greater precision in the placement of a text or graphic element in a specific place, instead of using the mouse or the pad to do so, use the arrows on the keyboard. In this way the position accuracy will increase significantly.

Another recommendation to obtain precision when editing the design is to work with the zoom, either increasing or decreasing it, this will also help a lot. You will find the option in the lower right corner.

Zoom option at the bottom right.

Additional questions and customer support

If we haven't covered a particular topic, or you have any additional specific questions please feel to get in touch with us directly where we'll more than happy to help in any way that we can!

We really want to make sure you're happy with your purchase so please don't hesitate to get in touch with us directly. We would encourage you to send us a DM before leaving a comment or initially not recommending the product as we always make sure we answer queries ASAP. Customer service is at the core of our business, so it's something we take super seriously. If there's anything you'd like to ask us about - fire away!

If you'd like to recommend our product (and we hope that you do!) that would mean so much to us! Not only does it help to support Wildnun Studio but it also helps other creatives find our shop and products. Thank you for spreading the love!

Thank you once again for purchasing with us and be sure to keep in touch by following us over on [Instagram](#). Let's be friends!

Stay awesome,

Manuel from **Wildnun Studio**.

THANK YOU.
